## SUMMARY METRICS FOR National Chengchi University (All subject areas) (ASJC)

National Chengchi University published 3,512 items in 2020–2025 and received 21,060 citations overall.

Scholarly output rose from 542 publications in 2020 to 613 in 2024, a 13% increase (2020→2024).

Citation counts fall in later years (2020: 6,769 → 2024: 1,535), a -77% change between 2020 and 2024; this decline is expected because recent years have had less time to accrue citations.

The overall Field-Weighted Citation Impact (FWCI) mean is 0.79, which is 21% below the world mean of 1.00, and the overall FWCI median is 0.26, which is 35% below the world median of 0.40.

Note: the FWCI mean shows a jump to 1.05 in 2025 (a young year) — FWCI can be skewed by a few highly cited papers, so this spike may reflect volatility or individual highly cited items.

## COMPARISON WITH TAIWAN (EXAMPLES) — TWO METRICS

FWCI: Taiwan's overall FWCI mean is 1.21 and FWCI median 0.52; National Chengchi's FWCI mean (0.79) is about 35% lower than the country mean, and its FWCI median (0.26) is about 50% lower than the country median — indicating the institution's citation impact per field is below national averages.

Citation counts and output trends: both National Chengchi and Taiwan show large year-to-year citation declines from 2020 to 2024 (institution: -77%; country: -74%), so the recent fall in citations is similar in magnitude and likely driven by the same recency effect.

Scholarly output growth at National Chengchi (+13% from 2020 to 2024) modestly outpaced Taiwan's publication growth (+9% over the same period), showing the university is increasing its publication volume even though its field-normalized citation impact remains below the national benchmark.

## National Chengchi University

[More details about this Institution](#) [Create report](#)

### Create report from template

#### 1. Name report

#### Institution High Level Report

Gives the key metrics for a summary of a single institution. Requires a minimum of 10 publications.

##### Analyses:

- Summary metrics
- Publication share by Subject Area
- Topics
- Field-Weighted Citation Impact
- Geographical Collaboration - Overall
- Academic-Corporate Collaboration
- Top collaborating Institutions
- Output in Top Citation Percentiles (excl. self-citations)
- Publications in Top Journal Percentiles by CiteScore Percentile
- Top Authors

Include metrics guidance for each analysis

**Note:** once a report has been created from a template, you can change the name of the report.

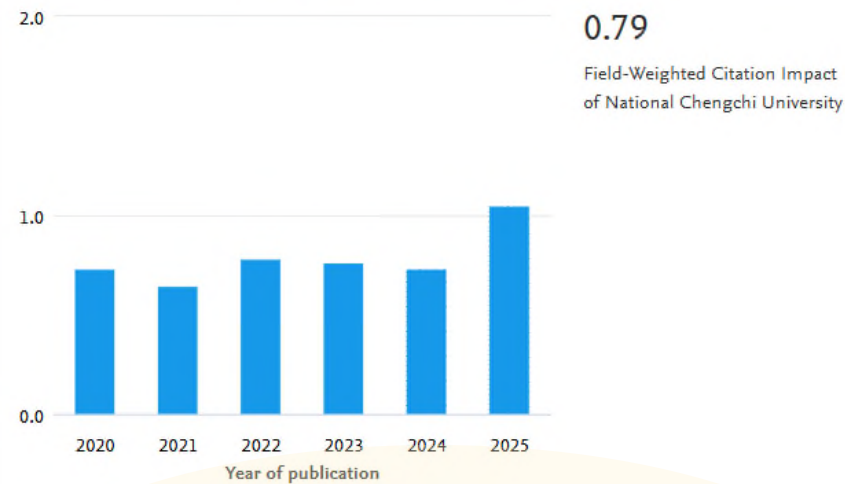

#### View and edit report

#### Field-Weighted Citation Impact

Entity: National Chengchi University · Within: All subject areas (ASJC) · Year range: 2020 to 2025 · Data source: Scopus, up to 31 Dec 2025 · [Explore / edit analysis](#)

Incomplete year

Field-Weighted Citation Impact (FWCI) indicates how the number of citations received by the institution publications compares with the average number of citations received by all other similar publications in Scopus. A FWCI of 1.00 indicates that the institution's publications have been cited exactly as would be expected based on the global average for similar publications. A FWCI of more than 1.00 above average citations; for example, 2.11 means 111% more than the world average.

**Note:** for institutions with a scholarly output less than 1,000, please beware of highly cited publications which may skew the FWCI.

#### Create Report from Template for this Institution

- [Institution Collaboration Report](#)  
Gives a detailed look at the collaboration for an institution, including the top collaborating institutions.
- [Institution High Level Report \\*](#)  
Gives the key metrics for a summary of a single institution.
- [Institutional Benchmarking Report \\*](#)  
Benchmark a number of institutions against each other. The report uses a mixture of simple and more complex citation metrics with which to compare multiple institutions.
